Subject: State Route 8 Corridor Operations Planning Study-Final Report

Dear Ms. Moon-Sirianni:

Per your request, I am pleased to provide PennDOT District 11-0 with three copies of the final report for the Corridor Operations Planning Study that was recently completed for State Route 8 in Hampton and Richland Townships. This final report incorporates comments made by D-11 staff, SPC staff, and the study team. As you know, this study was completed for the area between Duncan Avenue and Bakerstown Road. Some of the highlights in the report include suggestions on:

- Left turn storage lengths (Figure 6);
- Enhanced multimodal opportunities (Figures 11-14);
- Intersection of Route 8 and Wildwood Road (Figure 25). Improvements at this intersection appear to be a priority for residents and officials in the area based on our key person interviews;
- Adjacent intersections of Route 8/Route 910 and Route 910/Community Drive (Figures 39-43); Richland Township has previously discussed improvements and a new traffic signal at Community Drive with your staff; and
- Future alternatives for the Bakerstown Road interchange with Route 8 (Figures 51-54)

We are hopeful that this report is useful to the District and the communities as you plan future projects along this corridor.

If you have any questions about the report, please do not hesitate to call or e-mail me at 412-391-5590 ext. 341 or ddandrea@spcregion.org. We look forward to working with you on similar studies in the future.

Sincerely,

Domenic A. D'Andrea, P.E., PTOE
Manager, Transportation Operations and Safety
